PROFILE

Java Software Engineer with 5+ years of full-stack experience in Spring/Spring Boot, Jakarta EE and PostgreSQL, with Vue.js, Angular and JSF frontends. Spring-certified, test-driven and focused on maintainable design. Communicative and hands-on: I enjoy working closely with testers, operations and stakeholders. Expanding into Docker, CI/CD and Kubernetes (CKAD in progress).

WORK EXPERIENCE

Java Consultant

Conspect

Nov 2023 – present

📍 Almere, The Netherlands

IT consultancy in agile software development and data analytics.

Full-Stack Java Engineer

Project: OptieCon (internal product)

Jun 2026 – present

Employee share scheme app. Angular SPA + Spring Boot API.

- Built the **security and authentication**: Microsoft Entra ID (Azure AD) SSO via OAuth2/OIDC + PKCE, with MSAL in Angular and a Spring Security OAuth2 Resource Server.
- Wrote ~30 security tests (tokens, authz, CORS).

Stack: Java 21 • Spring Boot 3.5 • Spring Security • Microsoft Entra ID • Angular 20 • PostgreSQL • Docker

Sabbatical Jan 2026 – May 2026

South-East Asia: Muay Thai camp, backpacking and surfing.

Full-Stack Java Engineer

Project: Dienst Justitiële Inrichtingen (DJI)

Jan 2024 – Jan 2026

📍 Veenhuizen, The Netherlands

Government organisation, Agile DevOps team. Modular Spring monolith moving to Spring Boot microservices on OpenShift.

- **Sole developer of a new application** replacing part of the legacy JSF system: designed and built its **JWT-based authentication and authorisation** and its Vue.js frontend from scratch, plus **much of its REST API** on the existing Spring backend.
- **Day-to-day full-stack development**, mainly backend: features, bug fixes, TDD (JUnit, Mockito), code reviews; worked with operations on the app's deployment.

TECHNICAL SKILLS

BACKEND

Java • Spring/Spring Boot • Spring MVC • REST • OpenAPI • Jakarta EE • JAX-RS • WildFly • Maven

SECURITY

Spring Security • OAuth2/OIDC • JWT • Keycloak • Microsoft Entra ID

DATABASE & PERSISTENCE

PostgreSQL • SQL • JPA/Hibernate • Spring Data JPA • JDBC/JdbcTemplate • Flyway

TESTING

JUnit • Mockito • Testcontainers • Unit & integration testing • Test-Driven Development (TDD)

FRONTEND

Vue.js • Angular • TypeScript • JSF • HTML/CSS/JavaScript

DEVOPS

Docker • Docker Compose • GitHub Actions • CI/CD • Git • GitLab • Bitbucket

SOFTWARE DESIGN

Layered & hexagonal architecture • DDD • Clean code

CERTIFICATIONS

Spring Certified Professional

VMware by Broadcom • Aug 2025

Professional Scrum Master I (PSM I)

Scrum.org • Jan 2025

Oracle Certified Associate, Java SE 8 Programmer

Oracle • Jun 2024

Certified Kubernetes Application Developer (CKAD)

The Linux Foundation • In progress

WORK EXPERIENCE (CONTINUED)

- Gave knowledge sessions on the app's authentication and on client-side rendering; thorough handover.

Stack: Java • Spring • PostgreSQL • JPA/Hibernate • JUnit • Mockito • Vue.js 3 • JSF • Maven • Git/GitLab

Full-Stack Java Developer

LinkPizza: Content & Influencers

Feb 2021 – Oct 2023

📍 Amsterdam, The Netherlands

Influencer marketing platform, team of 3–4 developers. JSF monolith on WildFly being migrated to Quarkus microservices on Kubernetes.

- Built the **Media Kit**: a public influencer profile page designed to turn visitors into sign-ups, and the pilot for moving from JSF to Angular. Developed the Angular frontend and much of the backend: business logic, data access and REST endpoints (JAX-RS). When the company stayed on JSF, rebuilt the frontend in JSF/PrimeFaces; still in use. Also shaped its concept and design.
- **Backend development in Jakarta EE**: business logic in services; data access with JPA/Hibernate and JDBC (hand-written SQL, DTOs per use case).
- **Full-stack features and bug fixes, end to end**: from JSF/PrimeFaces UI and backing beans to services and persistence.

Stack: Java 11 & 17 • Jakarta EE • WildFly • JAX-RS • JSF/PrimeFaces • Ajax • Angular 14 • PostgreSQL • JPA/Hibernate • JDBC • Maven • Git/Bitbucket

EDUCATION

Minor Programming – 30 EC

University of Amsterdam

📅 2018

- Harvard CS50: Introduction to Computer Science | 6 EC
- Android App Development | 12 EC
- Programming Theory (Heuristics) | 12 EC

BSc Political Science – 180 EC

University of Amsterdam

📅 2016 – 2019

VWO

Het Amsterdams Lyceum

📅 2007 – 2013

PERSONAL PROJECTS

Jamigos 🌀

Full-stack project • security & DevOps practice

📅 Aug 2025 – Nov 2025

- OAuth2/OIDC login via Keycloak (JWT); multi-chain Spring Security, method security and AOP-based ownership checks and audit logging.
- Spring Data JPA (PostgreSQL) and Spring Data MongoDB; unit, slice, security and integration tests (Testcontainers).
- GitHub Actions CI/CD: path-based change detection, build & test, Docker images to GHCR, deployed as three services (Vue.js frontend, Spring Boot backend, Keycloak) on Render; local, dev and prod profiles.

Stack: Spring Boot • Spring Security • Keycloak • PostgreSQL • MongoDB • Vue.js • Docker Compose • GitHub Actions • Testcontainers

Spring Persistence & Architecture Series

Backend portfolio series

📅 Jun 2026 – present

Each project is designed before it is built: architecture and code design from the requirements, an OpenAPI contract, a C4 model, a DBML schema and Flyway migrations.

- **P1 Subscription Tracker** 🌀: layered architecture, JDBC/JdbcTemplate, code-first OpenAPI • 63 tests
- **P2 Recipe Book** 🌀: JPA/Hibernate, design-first OpenAPI (code generation), ArchUnit • 109 tests
- **P3 Journal** 🌀: hexagonal architecture, rich domain model, Spring Data JPA, MapStruct, optimistic locking, ADRs, design-first OpenAPI • 79 tests (in progress)

Stack: Java 26 • Spring Boot 4.1 • PostgreSQL • Flyway • OpenAPI • ArchUnit • Testcontainers

Testing: 251 hand-written tests, all test-first (TDD): unit, slice, integration (Testcontainers) and architecture tests.

Scentify 🌀

Android app • Java

📅 Nov 2020 – Jan 2021

Fragrance recommender: a questionnaire across multiple activities, matched against a perfume catalogue; custom list adapter and detail screens.
